

The Pyle Audio '*Sound Base*' Tabletop Speaker, Creating an Intimate In-Home Entertainment Experience

NEW YORK – (Oct. XX, 2014) -- [Pyle Audio](#) introduces the Pyle *Sound Base* (PSBV600BT) Bluetooth TV Stand Soundbar, a contemporary speaker designed for tabletop placement. The Tabletop Soundbar is made for direct positioning under a TV screen, aimed to provide instant family room entertainment.

The Soundbar offers a user-friendly option for those seeking an immersive home-entertainment experience. With built-in Bluetooth, the PSBV600BT allows audio to be wirelessly streamed from any Bluetooth-enabled device. The inclusion of exceptional sound reproduction technology exposes users to the entire audio spectrum, creating an intimate and enjoyable atmosphere for program-viewing.

Included with a tabletop TV stand mount, the Sound Base is an ideal companion for a new high-definition screen, instantly upgrading any entertainment area. Due to the Soundbar's range of speakers, users can expect a full-bodied listening experience.

"The Tabletop Speaker provides amazing sound," says Abe Brach, President of Pyle Audio. "We believe the market has been lacking in terms of TV-compatible speakers, but the PSBV600BT solves that problem. We're excited for people to experience it!"

PSBV600BT Features Include:

- Built-in Bluetooth for instant wireless music streaming
- Works with all of your favorite Bluetooth-enabled devices
(iOS & Android smartphones and tablets, iPods, MP3 Players and more)
- System doubles as TV Speaker base entertainment system
- Ported tube design for extended bass performance
- Convenient source selection with LED indicators
- Easy touch button audio select control center
- AUX (3.5mm) input connector jack

The Pyle *Sound Base* (PSBV600BT) is available for \$149.99 at www.pyleaudio.com.
